

Determination of Eligibility and Effect

Nez Perce - Clearwater National Forests

Klondike Group Exploratory Project

Project Title

Clearwater N.F.

Forest Unit

R2018011700047

INFRA Event Number

Based on information included within the attached information, the Forest Service has made the following eligibility and effect determinations and is requesting Idaho SHPO concurrence. Mitigation measures and/or other monitoring requirements for the project are provided below.

Table 1: National Register eligibility of cultural resource site(s) associated with the current undertaking

Listed Sites	Eligible Sites	Not Eligible Sites	Unevaluated Sites
Total: 0	Total: 0	Total: 0	Total: 0

Effect (Stipulation V of the North Idaho Programmatic Agreement):

☐ Because of the type of project, and/or its location, the Forest Cultural Resource Specialist has determined the above project has little likelihood to adversely affect cultural properties. As a result, a *No Inventory Decision* has been made and the project may proceed.

☒ An appropriate inventory has been conducted for the above project and no cultural properties are located within the area of potential effects. As a result, the Forest Cultural Resource Specialist has made a *No Historic Properties Affected* determination and the project may proceed.

☐ An appropriate inventory has been conducted for the above project and cultural resources are known to be located within the area of potential effects. Concurrence from the Idaho SHPO is thus required, however, the Forest Cultural Resource Specialist has made a preliminary determination that the project will have *no adverse effect* to these properties because:

☐ The cultural resources are not eligible for the National Register of Historic Places.

☐ The project has been designed to avoid effects to significant components/features associated with listed, eligible or unevaluated cultural resource sites.

☐ Other rationale exists and is explained below.

☐ This project will have an *adverse effect* to an historic property. However, an attached report/plan/MOA provides information and deliverables which successfully resolve, minimize, or reduce adverse effects to listed or National Register eligible cultural properties per 36 CFR 800.6(b)(iv) and the project may proceed.

PROJECT MITIGATION/MONITORING REQUIREMENTS

The following measures must be implemented in order for the above listed project to comply with the National Historic Preservation Act (54 USC §100101), as amended by Public Law 96-515.

There are no mitigation measures associated with this project.
